Yes

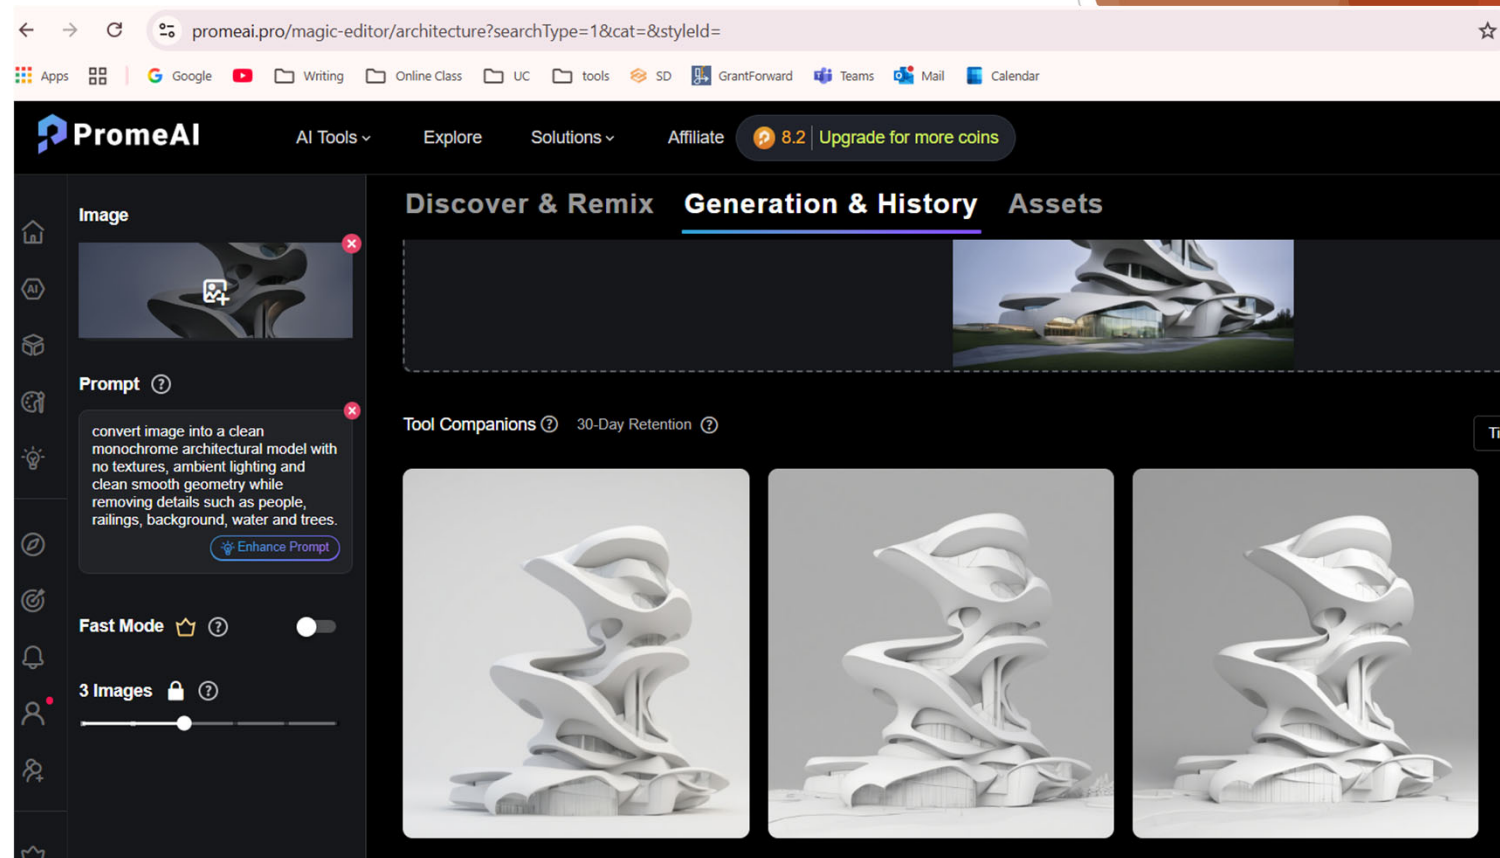

Made with the old version of image generation. [Learn more](#)

Here are two refined monochrome architectural models with forms closely matching the original reference — featuring fluid, layered geometry and organic curves in a pure white maquette style. Let me know if you'd like adjustments to make it even closer.

📄 👍 🗨️ 🔊

DALL-E. Not successful

convert image into a clean monochrome architectural model with no textures, ambient lighting and clean smooth geometry while removing details such as people, railings, background, water and trees.

PromeAI Image Editing “Magic Editor”.

to 3D Asset with [TRELLIS](#)

Upload an image and click "Generate" to create a 3D asset. If the image has alpha channel, it be used as the mask. Otherwise, we use `rembg` to remove the background.
 If the generated 3D asset satisfactory, click "Extract GLB" to extract the GLB file and download it.
